Program Overview

The **AIM-AHEAD FHIR (Fast Healthcare Interoperability Resources) Collaborative Training Program** will train a multidisciplinary cohort from academia, industry, healthcare, and community organizations to accelerate and sustain adoption of FHIR across clinical and research environments.

FHIR is a modern, widely implemented standard for representing and exchanging healthcare data across health IT systems. By normalizing data access, FHIR enables reusable pipelines and applications for research, quality improvement, public health, and operational analytics.

The program will build a national network of FHIR champions – researchers, clinicians, software developers, informaticists, and other healthcare professionals – forming a well-trained cohort capable of appropriately using FHIR to advance basic, clinical, social, and behavioral science.

There are three tracks for the AIM-AHEAD FHIR Collaborative Training Program, and all learning will be 100% online. Only Track 3 participants are expected to attend the in-person AIM-AHEAD conference in July 2026.

Award Details

Track	Details
Track 1	$1,000 stipend upon completion of Track 1 training
Track 2	$4,000 stipend disbursed in two installments.
Track 3	$8,000 stipend disbursed in two installments, and a $2,000 travel allowance to cover travel expenses to attend the AIM-AHEAD Annual Meeting in July 2026.

Note: Stipend payments are awarded based on the completion of required program milestones.

Program Timeline
